Stagestep Offers an Array of Dance Floor Surfaces and Floating Wood Subfloors

For many, it may seem like an overwhelming choice of products and options that is off-putting. It doesn't need to be.

Stagestep is here to guide you to your perfect flooring system suitable for how and where you dance. Answer a few questions and our representatives will put together a written proposal which will include everything you need.

We will customize materials to fit your space and we will provide installation and maintenance guides, online instructions, and technical support via the phone and on our website.

What's New

Timestep- Now offering an additional range of colors. See page 8.

Introducing **Pulse**, a new professional grade studio flooring with foam-backing to cushion point shoes. For all forms of dance except tap. See page 13.

Introducing **Ovation**, a high-gloss, light-weight portable and permanent flooring in six vibrant colors. See page 11.

INFORMATION ABOUT INSTALLATION AND MAINTENANCE IS PUBLISHED ON OUR WEBSITE

Where Do I begin?

Prioritize your choices by answering the following questions. Then call **Stagestep** to select products and get a written quote.

CONSIDER THE CIRCUMSTANCES

1. Do you rent or own the space?
2. Is this new construction or a renovation?
3. Will this be long-term or short-term use?
4. Do you want your floor system to be portable, permanent, or semi-permanent?

DEFINE THE SPACE

1. What kind of floor or slab is currently in the space?
2. What is the slab/floor's current condition?
3. Where is the space (basement, first floor, home, commercial space, theatre)?
4. What is the length and width of the space (in feet or meters)?
5. Is the space temperature and humidity controlled?
6. What is the ceiling height?

FLOORING USE

1. What type of activities will take place on the floor?
2. Is the space under supervision while in use?
3. Will the space be occasionally used for other activities such as receptions?
4. Will equipment be used or placed on the floor?

What Do I Need to Know to Prevent Injury?

SAFETY

Safety is the number one issue with dancers and their teachers when it comes to floors. The first safety concern is the non-slip characteristic of the surface. Ballet dancers need very non-slip surfaces while contemporary dancers in bare feet need smooth, giving surfaces so the floor does not cause injury to the bottoms of their feet. Tappers need some give, yet also need the assurance under foot of a surface on which they can slide. Ballroom and theatre dance require a "fast" (less nonslip) surface.

In an ideal world, each dance discipline would have its own unique floor surface. Since this is unlikely, **Stagestep** offers floors that can be "adjusted" to meet the average needs of different dance disciplines. We also have finishes and treatments that can modify a floor surface to be more accommodating to other dance styles.

SHOCK ABSORBENCY

The second safety concern is the ability of the floor to absorb and dissipate energy, and/or safely return energy (resilient energy). If the floor fails to absorb or safely return energy, the body becomes the shock absorber, resulting in fatigue, pain, and injury. A performer's nemesis is concrete or any other surface that is hard and unyielding.

All movement activity generates energy. Energy directly returned to the body can result in shin splints, back and knee problems, fatigue, strains, and even broken bones. A non-energy absorbent floor or flooring system is dangerous. It can result in injury and lawsuits. Concrete is non-energy absorbent. Any substance put directly on concrete does not remove you from the concrete unless it contains air (like foam). Basket weave and foam sprung floating subfloors provide shock absorbent characteristics that reduce the problems associated with hard, non-absorbent floors.

LATERAL FOOT SUPPORT

Perhaps the most overlooked attribute is lateral foot support. Without lateral foot support, the dancer cannot maintain balance. The leading cause of injury is not shin splints but ankle injury, due in part to flooring systems that rely solely on absorbent materials or systems that are too spongy. A term you may come across is **point elastic**, meaning deflection of the floor at the point of impact. The greater the deflection, the more unstable the floor.

Other Basics to Know:

MAINTENANCE

It's important for every dance floor system to have a maintenance schedule. Wood floors need extra care, with screening or sanding and finishing every 12 months. All floors require daily, weekly, and monthly attention. **A clean and hygienic floor is a safe floor.**

Complete maintenance advice and instructions are available in our Maintenance Guide online @ stagestep.com

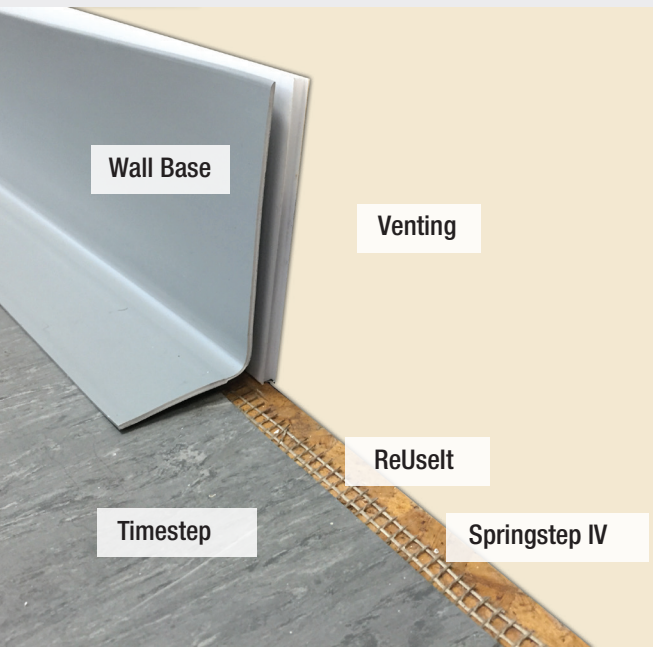

ENVIRONMENT

Big swings in humidity and/or temperature can cause adverse effects, such as expansion and contraction, and/or excessive slipperiness. Direct sunlight may cause floors to expand as well. Windows should have curtains, shading or adequate tinting.

TELEGRAPHING (VISIBLE SEAMS)

Does not affect performance or wear. It is not a defect. Most floating subfloors will telegraph seamsline from below, to some extent.

To order, call in the U.S. (800) 523-0960 or Canada (866) 491-9019

Everything you Need to Know About Creating a Dance Studio Floor System

VAPOR BARRIER

A vapor barrier is the first step. It is always needed for installation over concrete or sub-grade floors that do not have a vapor barrier already installed. Vapor barriers prevent moisture from escaping the concrete and being absorbed by the wood subfloor, potentially swelling and warping the wood. (See page 23.)

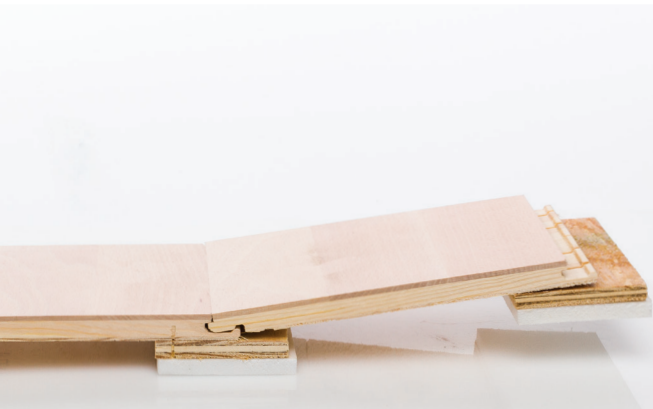

FLOATING WOOD SUBFLOOR

A floating wood subfloor is one of the most important elements. It provides shock absorption, resilience, and lateral foot support. Wood is totally suspended off the slab. (See pages 15-19.)

FLOOR SURFACES

Consider budget, types of dance activity, color, wear characteristics and texture. Avoid VCT, laminate and all non-dance floor certified products.

- **Rollout flooring:** All rollout floors, typically referred to as marley (vinyl) floors, are available in a variety of material configurations and a multitude of colors. Different flooring surfaces are best suited to specific disciplines. Some flooring can be used of all types of dances. (See pages 8–13.)
- **Encore:** A click-and-lock transportable hardwood floor with a factory finish and integrated sprung floor. No adhesive, screws or nails required. (See page 14.)
- **Hardwood:** For a permanent installation, a tongue-and-groove hardwood surface available in a variety of woods with a SpringFlex floating wood subfloor. (See pages 16-17.)

Click-and-lock system Encore system

ADHESIVES & TAPES

There are five options for affixing vinyl flooring to your subfloor. Choosing the proper product for your installation depends on whether you are permanently, semi-permanently or temporarily installing your floor. (See page 22-23.)

TRANSITION RAMP

ADA safety standards require a ramp for access without any blockage for surfaces that rise 1 1/2" above the ground. Ramps are lightweight and can easily support more than 1,000 lbs. (See page 23.)

VENTED WALL BASE

Subfloors are designed, constructed, and installed to leave a 1/2" gap between the floating subfloor and the wall to allow for air circulation. A vented wall base is designed to cover this space. (See page 23.)

MAINTENANCE PRODUCTS

Stagestep offers a variety of maintenance products and finishes to help your floor stay clean and sanitized. (See page 24-25.)

Our Customers Say It Best

"I loved working with Stagestep as I realized my lifelong dream of building out a dance studio. Dancing on the floors is an absolute joy!"

Our Best-Selling Duo

TIMESTEP

The ultimate multi-purpose floor ideally suited for all movement activity including tap, hip-hop, ballet, contemporary, character, ballroom, jazz and flamenco. Heavy duty portable and permanent flooring for stage, touring and studio. Can handle heavy scenery and props. Surface can be treated for differing degrees of non-slip. (See pages 8-9.)

SPRINGSTEP IV PLUS IMPROVED

The professional standard for floating wood resilient permanent and semi-permanent subfloors over concrete slabs and other hard surfaces. Resilient and energy absorbent. Safety and performance at a great price.

The nominal 2' x 2' prefabricated panels, with tongue and groove connection system, rest on "L" shaped high density foam suspension forms. **Springstep IV Plus** offers excellent energy absorption and resilience. Its tongue and groove system allows for easy assembly.

The 9.4 lb panels can be installed in hours instead of days. No screws. No staples. No nails. No patching. No sanding. It is 1/4 the work with only rotary saw needed to cut panels to fit the space and stagger the seams. Easy to disassemble, move to a new location, and re-install. (See page 19.)

Cushion-Backed Dance Floors

Stagestep offers three (**Dancestep Plus**, **Woodstep Plus**, and **Woodstep Ultra**) rollout floors that have heavy-duty wear surfaces and high-density foam underlayments. They can be installed directly over sealed concrete and have very good absorbency, excellent performance, but reduce the level of sound generated, which means they are **not recommended for tap**. (See pages 12-13.)

FLOATING WOOD SUBFLOORS

Stagestep offers multiple floating wood subfloors (**Springstep II, III, IV Plus** (with customized variations), **V, SpringFlex**) to absorb, dissipate, and provide safe, resilient energy return. (See pages 17-19.)

All floor surfaces without foam backing provide no relief from a hard concrete slab. This includes wood floors placed directly on wood joists. Check the adjacent flooring charts for relative characteristics and the ideal combination for your movement activity.

Our Customers Say It Best

*"All of my studios have **Stagestep** flooring back from 1981. If you want the quality and the installation of your life that's going to last, and really make your studio special, think of **Stagestep**."*

Joan Myers Brown

Aluminum compound taps can disintegrate on flooring, leaving a black/grey residue. See maintenance instructions online at stagestep.com. To avoid this residue, use aluminum or steel taps. Use TapShield (page 24) or FloorShield Maintenance System (page 25) to lessen this problem. For Micron Wipes (see page 24).

Our Customers Say It Best

*"We are very happy with our **Stagestep** floors at our historic studios in New York City—so when we built our new extension in Long Island City, there was no question whom we would call first. **Stagestep's SpringFlex** subfloor systems and rollout **Super Timestep** vinyl flooring is high-quality, durable, and a tremendous value. They handled everything from selecting the most appropriate floor for our needs to installation. Our instructors and students have been dancing on our new floors and they are thrilled."*

F. Lee Merwin

Director of Operations, Joffrey Ballet School

Specialty Collection

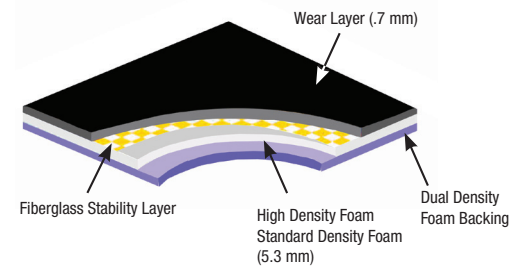

Dancestep Plus Flooring

Dancestep Plus is a dual-density foam-backed flooring designed to be installed directly on a properly sealed concrete slab. Dual-density foam gives increased energy absorption. Textured wear layer makes for a non-slip surface. Great for all styles of dance except tap (due to sound reduction).

Price	See insert or website for current pricing
Thickness	.24" (6.0 mm)
Width	6.56' (2 lm)
Weight	6.73 lbs. per sq. yd. (3.65 kg per sq. meter)
Full Roll Length	65' (20 lm)
Full Roll Weight	322 lbs (146 kg)
Full Roll SQ FT/YD (M²)	430 sf/47.38 sy (40 m ²)
Colors	Solid Black, Solid Grey
Material	4-Layer laminate Fiberglass-lined Single PVC wear layer Dual Base foam layer
Guarantee	1 year against wear

At A Glance

- Heavy-duty
- Installs directly over concrete
- Excellent for professional and home use
- Easy install
- Non-slip

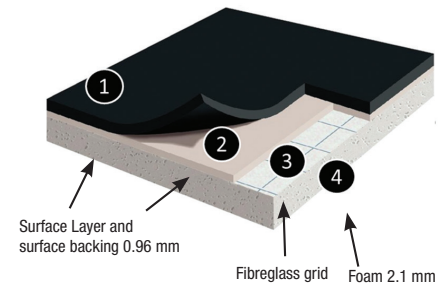

Dual layer cushion base for double the energy absorption.

Pulse Flooring **NEW**

Pulse, the studio performance floor for ballet, contemporary, and jazz. Cushion-backed flooring reduces sound. Non-slip surface ideal for pointe work. Not recommended for tap (sound muting).

Price	See insert or website for current pricing
Thickness	.122" (3.1 mm)
Width	4.92' (1.5 lm)
Weight	4.24 lbs. per sq. yd. (2.3 kg per sq. meter)
Full Roll Length	65' (20 lm)
Full Roll Weight	152 lbs (69 kg)
Full Roll SQ FT/YD (M²)	322.9 sf/35.88 sy (30 m ²)
Colors	Black, Grey
Material	4-Layer laminate Single PVC wear layer Surface backing Fiberglass grid Base foam layer
Guarantee	1 year against wear

Non-slip surface ideal for contemporary, jazz, ballet and pointe work. Not recommended for tap (sound muting).

Our Customers Say It Best

"One of the best investments a studio owner can make for their dancers is quality flooring with injury preventing elements. The safety and longevity of the ICON dancers is most important to us, and there is no better choice than Stagestep flooring."

GEO Hubela
Dancer, Master Teacher, Choreographer

Our Customers Say It Best

*"When we built Starwest Studios in Hollywood, a state of the art broadcast dance studio, before all the lights, cameras and action, we had to lay the foundation. That is when we decided to install the best, a 3800 square foot **Stagestep** sprung wood dance floor. Our choreographers expect only the best! Starwest Studios has the largest sprung wood floor in Los Angeles, including a marley sprung floor also from **Stagestep** with a white Cyc for filming dance."*

Plywood layout for Springstep II and Springstep III

SPRINGSTEP II FOAM BLOCK LAYOUT

SPRINGSTEP II FOAM CUBE LAYOUT

3" x 3" x 3/4" Nominal Foam Block

Springstep II & III

Multi-purpose floating wood subfloor for all dance activities. Select resilience (spring) and absorbency suitable for what you do. The only custom transportable subfloor on the market.

Springstep II—Build It Yourself

Resilient floating wood subfloor that comes 2 3/4" (69.85 mm) or 1 1/2" (38.1 mm) off the slab. Will amplify sound levels in the room. Ideal for all dance styles. **Springstep II** consists of 2 layers of 1/2" (12.70 mm) foam underlayment grade plywood resting on two-inch resilient foam cubes (100 cubes per 4' x 8') or 3" x 3" x 3/4" nominal high foam blocks (52 per 4' x 8'). Requires one-inch deck screws to be counter-sunk and filled. **Stagestep** provides only the foam cubes or blocks, plus all the support you need.

Estimated Costs: Due to current fluctuating market conditions cost of plywood cannot be estimated. Check your local supplier.

Springstep III—The Ballroom Alternative

The most absorbent and least resilient of the subfloors, comes 1 1/2" (38.10 mm) off the slab. Reduces sound levels and works exceedingly well for ballroom dance.

Springstep III consists of 2 layers of 1/2" (12.70 mm) ply resting on 1/2" (12.70 mm) cross-link cell foam sheeting covering the entire slab. Specifications are the same as Springstep II except for 1/2" (12.70 mm) foam sheeting. Requires one-inch deck screws to be counter-sunk and filled. **Stagestep** provides only the foam sheeting, plus all of the instructions and phone support you need.

Estimated Costs: Due to current fluctuating market conditions cost of plywood cannot be estimated. Check your local supplier.

ReUselt

ReUselt System

New improved formulation.

The **ReUselt** system gives you all the benefits of a permanent installation with the ease of a semi-permanent installation—without the use of top tape or the hassle of resetting your floor every two years. When you need to remove the floor, you simply peel it up and take it away. Purchase a new supply of **ReUselt** and install at your new location. Used **ReUselt** is removed from the sub-floor and thrown away. This is a DIY product. Just follow the easy directions that come with each roll.

Full rolls only

3 1/4' x 82 1/2' = 268 sq. ft. (1 lm x 25 lm)

Save 10% when purchased with flooring.

Note Not for use with Timestep T.

Caution Exposure to extreme or variable heat conditions can cause failure. Contact **Stagestep** with questions.

For use with **Springstep IV** system.
(Other subfloor systems have not been tested.)
Installation instructions are available online at stagestep.com

INFORMATION ABOUT INSTALLATION AND MAINTENANCE IS PUBLISHED ON OUR WEBSITE

Adhesive, Vapor Barrier, Wall Base

PERMANENT INSTALLATION

Stagestep Vinyl Adhesive

4 Gallon Pail

10% off with flooring order

One gallon covers 15 sq. yds. (13m²)

One bucket covers 540 sq. ft. (52 m²)

Welding Rod

Available for **Timestep** and **Super Timestep** only. Must be professionally installed. Available in black, grey or tan.

300 ft. (91.44 lm)

Stagestep Plastic Vapor Barrier

Excellent **8 mil** sheet vapor barrier with an extra reinforcement scrim laminated in between the polyethylene layers.

4' x 100' 400 sq. ft. (1.22 lm x 30.48 lm)

10% off with flooring order

Moisture Proof Tape

Used in conjunction with **Stagestep Vapor Barrier** on top of seams and around perimeter. Can also be used as seam tape for foam sheeting.

(2" x 60 yards)(48 mm x 55 lm)

Bone Dry Concrete Sealer (Liquid)

Bone Dry Plus is a penetrating, permanent, waterproofing concrete sealer. Designed with an anti-microbial for long-term sealing of concrete prior to installing **Stagestep** flooring products. It is easy to apply. With over 30 years of use without call backs or job down time, **Bone Dry** is the ultimate water vapor solution.

Bucket (5 gallons)

One bucket covers (750ft² 7 – 1000 ft²) (69.68m² – 92.9 m²)

10% off with flooring order

Vented Wall Base

Two part system with special backing material allows the area below the subfloor to constantly ventilate. Top layer coordinated color with flooring. Ventilated floor systems maintain the floor's dimensional stability, and help reduce any possible moisture build up below the subfloor. Subflooring should be installed at least 1/2" from wall.

Sold in 78 3/4" (2 lm) long sections

Each section is 4" high with a 2" toe. (\$4.27 per running foot)

Colors—available in Black, Tan, or Grey.

Vented Wall Base Double-Faced Tape

Used in conjunction with Vented Wall Base adhering special backing material (white fluted plastic strips) to the base of wall and wall based to the special backing.

(2" x 60 yards)(48 mm x 55 lm)

See insert or our website for latest pricing.

Free shipping & handling for all products on this page in the contiguous United States. Order online.

Please contact **Stagestep®** for shipping & handling information outside the contiguous United States.

Maintenance

TapShield

A revolutionary topical solution.

Helps eliminate aluminum compound tap residue from all floors. **TapShield** is applied directly on to taps. Follow directions provided. One application treats one pair of shoes.

TapShield Single Use Size

Sold in quantities:

- 25
- 50
- 100

Micron Wipes

Stagestep's **Micron Wipe** picks up aluminum compound residue deposited by most tap shoes. The thinner Micron microfilament traps more dirt, dust, liquid, and bacteria than conventional microfiber.

- 5-10 times thinner than microfiber
- Lint-free and non-woven, no fraying
- Absorbs 5 times its weight in liquids
- Washable & reusable
- Fast drying

Pack of 10 Wipes (15 3/4" x 15 3/4" ea)

WINTER NOTIFICATION

Slip NoMor, ProClean NS and SimplyGone products shipping between December 15th to March 15th, or whenever freezing weather is forecast, require a \$5 surcharge for an added heat pack. Plus third day shipping cost if necessary.

ProClean

Super-concentrated industrial-strength floor detergent/degreaser that will not harm your floor or floor finish.

- Single** (1 gallon)
- Case of Four** (4 gallons)
- Pail** (5 gallons)

ProClean NS

Concentrated floor cleaner after initial application(s) delivers one-step non-slip treatment to vinyl floors without harming surface.

- Single** (1 gallon)
- Case of Four** (4 gallons)
- Pail** (5 gallons)

ProClean D No-Rinse

Disinfectant cleaner **virucide, fungicide, mildewstat & odor counteractant. Killing bacteria, fungus, algae, and viruses (e.g. effective against hepatitis-B-virus) and controls mildew. No rinsing when applied with mop. Kills Covid-19.

- Single** (1 gallon)
- Case of Four** (4 gallons)

ProClean Ultra

Super deep clean, to be used twice a year with a floor machine with a green pad at low RPM.

- Single** 1 gallon
- Case of Four** (4 gallons)

Slip NoMor

Our "liquid rosin" is a super-concentrated formula which makes an economical non-slip solution which treats all floor surfaces—wood, tile, vinyl, and linoleum. The perfect substitute for rosin (which is not recommended for vinyl floors ever). Will not damage any surface.

- Single** (1 gallon)
- Case of Four** (4 gallons)
- Pail** (5 gallons)

SimplyGone

Stain remover and spot cleaner for wood and vinyl surfaces. Safely removes the following stains: food, beverages, grease, oil, most shoe polish, heavy grime, and scuff marks. Easy to use. Just apply, agitate and blot up. It is non-flammable and non-toxic and has an unlimited shelf life. It has little or no sudsing.

- Single** (1 gallon)
- Case of Four** (4 gallons)

Wipeout Plus

The eco-friendly, easy-to-use product that is ideal for removing dye and scuff marks. Its improved formula penetrates, loosens and dissolves many unwanted stains from all vinyl and non-porous surfaces. . It is the only solvent recommended for use on Stagestep vinyl dance flooring.

Free shipping & handling for all products on this page in the contiguous United States. Order online.

Terms & Conditions

AVAILABILITY

For items in stock, shipment is typically made within 24–72 hours, excluding weekends and holidays. For special orders including wood flooring, allow 3–6 weeks. Call **Stagestep** for earliest shipment date.

SHIPPING & HANDLING

Flooring and subfloors will be shipped FOB Philadelphia unless otherwise arranged.

All other products will be shipped prepaid UPS or FedEx unless shipped with flooring via interstate trucking. All freight prepaid.

For shipments outside the contiguous United States., please call for shipping & handling cost.

Stagestep is not responsible for delays in shipping & handling once product has left our warehouse.

To order floorcare products or installation products, shop 24 hours a day online or call **(800) 523-0960**, during business hours.

Shipping & handling for most online purchases are free in the 48 contiguous United States. We charge for shipping & handling for online orders to states outside of the contiguous United States. **Call for shipping cost for other locations.**

TERMS & PAYMENT

Purchase orders accepted from city, state, and federal institutions and public school systems. Net 30 days. All other orders must be prepaid. We accept **credit cards** (MasterCard, Visa, Discover, and American Express), **checks**, **wire transfers**, and **money orders** for U.S. currency. We can also provide current exchange rate for foreign currency.

Please note that trucking companies will not make inside deliveries. It is your responsibility to transport flooring from the truck into your facility.

All information and pricing supersedes materials published prior to January 2023. All prices and product specifications subject to change.

DAMAGED SHIPMENT AND CLAIMS

Any non-concealed damage to your shipment must be noted on shipping & handling documents at time of receipt. Photo documentation should be sent to **Stagestep** to facilitate all claims. If you experience any problem with a **Stagestep** product, you must notify us within 72 hours of receipt to validate, exchange, credit, or file insurance claim. Installation of flooring denotes acceptance.

All floor colors shown in this catalog are for reference only. Please call for samples.
